PLANT SCIENCE

Subject index

Volume 104 (1995)

Abscisic acid (ABA); Embryogenesis (somatic); In vivo and in vitro protein synthesis; Methyl jasmonate (JaMe); Osmotic stress; *Nicotiana plumbaginifolia* **104**, 59

Abscisic acid; Embryogenesis; Auxins; *Vitis vinifera* **104**, 193

Aging; Petals; Lipid peroxidation; Ethylene; Antioxidant enzymes **104**, 161

Agrobacterium tumefaciens; Carrizo citrange; Citrus; Genetic transformation **104**, 183

Allium cepa; Onion; Haploid plants; Gynogenesis; Thidiazuron; Flow cytometry; Isozymes; RAPD; Gametoclonal variation **104**, 215

Androgenesis; Embryogenesis; (Doubled) Haploid; Microspore culture; Tulip; *Tulipa gesneriana* **104**, 101

Antioxidant enzymes; Catalase; Seaweed; *Porphyra yezoensis*; Enzymatic properties **104**, 127

Antioxidant enzymes; Petals; Lipid peroxidation; Aging; Ethylene **104**, 161

Auxins; Embryogenesis; Abscisic acid; *Vitis vinifera* **104**, 193

Bacteriocidal polypeptide; Cecropin; Peach; *Prunus persica*; *Pseudomonas syringae* pv. *syringae*; Lytic peptide **104**, 17

***Beta vulgaris* L.**; Plasma membrane; Sugar transport; H^+-ATPase; Proton pumping; Mannose **104**, 153

Brassica napus; Oleosin; Transgenic tobacco; Oleosin targeting **104**, 39

Bulb scales; Cold storage; Cyanide-resistant respiration; Respiration; Tulip; *Tulipa gesneriana* **104**, 31

Ca^{2+}-Translocating ATPase; Calmodulin; Plasma membrane; Carrot suspension culture **104**, 23

Cadmium; Ethylene; *Oryza sativa*; Temperature **104**, 135

Calmodulin; Ca^{2+}-Translocating ATPase; Plasma membrane; Carrot suspension culture **104**, 23

Carrizo citrange; Citrus; *Agrobacterium tumefaciens*; Genetic transformation **104**, 183

Carrot suspension culture; Ca^{2+}-Translocating ATPase; Calmodulin; Plasma membrane **104**, 23

Catalase; Seaweed; *Porphyra yezoensis*; Enzymatic properties; Antioxidant enzymes **104**, 127

Cecropin; Peach; *Prunus persica*; *Pseudomonas syringae* pv. *syringae*; Bacteriocidal polypeptide; Lytic peptide **104**, 17

Cell culture; Ni tolerance; Selection; Toxicity **104**, 225

Cell viability; Cell wall; Plasmolysis; Protein and DNA uptake; Epidermal cells, suspension culture cells **104**, 201

Cell wall; Plasmolysis; Protein and DNA uptake; Cell viability; Epidermal cells, suspension culture cells **104**, 201

Characterisation and manipulation; *Zea mays* L.; In vitro pollination; In vitro fertilisation; Gamete isolation **104**, 1

Cicer arietinum; Ethylene; Polyamines; Germination **104**, 169

Citrus; Carrizo citrange; *Agrobacterium tumefaciens*; Genetic transformation **104**, 183

Cold storage; Bulb scales; Cyanide-resistant respiration; Respiration; Tulip; *Tulipa gesneriana* **104**, 31

***Colocasia esculenta* var. *esculenta* (L.) Schott**; Plant regeneration; Thin section culture; Germplasm conservation; Taro **104**, 93

Cryptogein; *Nicotiana tabacum*; *Phytophthora cryptogea*; Hypersensitive reaction; Esterified and/or glycosylated sterols; Phytoalexin **104**, 117

Cyanide-resistant respiration; Bulb scales; Cold storage; Respiration; Tulip; *Tulipa gesneriana* **104**, 31

(Doubled) Haploid; Androgenesis; Embryogenesis; Microspore culture; Tulip; *Tulipa gesneriana* **104**, 101

DNA Transformation; Pollen electrotransformation; Tobacco; *Nicotiana* **104**, 49

Embryogenesis (somatic); Abscisic acid (ABA); In vivo and in vitro protein synthesis; Methyl jasmonate (JaMe); Osmotic stress; *Nicotiana plumbaginifolia* **104**, 59

Embryogenesis; Androgenesis; (Doubled) Haploid; Microspore culture; Tulip; *Tulipa gesneriana* **104**, 101

Embryogenesis; Auxins; Abscisic acid; *Vitis vinifera* **104**, 193

Enzymatic properties; Catalase; Seaweed; *Porphyra yezoensis*; Antioxidant enzymes **104**, 127

Epidermal cells, suspension culture cells; Cell wall; Plasmolysis; Protein and DNA uptake; Cell viability **104**, 201

Esterified and/or glycosylated sterols; *Nicotiana tabacum*; *Phytophthora cryptogea*; Hypersensitive reaction; Cryptogein; Phytoalexin **104**, 117

Ethanol metabolism; In vitro culture; Plant hormones; Tobacco; Gas chromatography **104**, 147

Ethephon; Ethylene; Ethylene inhibitors; White spruce (*Picea glauca*); Somatic embryo maturation; Shoot meristem. **104**, 71

Ethylene; Cadmium; *Oryza sativa*; Temperature **104**, 135

Ethylene; Ethephon; Ethylene inhibitors; White spruce (*Picea glauca*); Somatic embryo maturation; Shoot meristem. **104**, 71

Ethylene; Petals; Lipid peroxidation; Aging; Antioxidant enzymes **104**, 161

Ethylene; Polyamines; *Cicer arietinum*; Germination **104**, 169

Ethylene inhibitors; Ethylene; Ethephon; White spruce (*Picea glauca*); Somatic embryo maturation; Shoot meristem. **104**, 71

Flow cytometry; *Allium cepa*; Onion; Haploid plants; Gynogenesis; Thidiazuron; Isozymes; RAPD; Gametoclonal variation **104**, 215

Gamete isolation; *Zea mays* L.; In vitro pollination; In vitro fertilisation; Characterisation and manipulation **104**, 1

Gametoclonal variation; *Allium cepa*; Onion; Haploid plants; Gynogenesis; Thidiazuron; Flow cytometry; Isozymes; RAPD **104**, 215

Gas chromatography; Ethanol metabolism; In vitro culture; Plant hormones; Tobacco **104**, 147

Genetic transformation; Carrizo citrange; Citrus; *Agrobacterium tumefaciens* **104**, 183

Germination; Ethylene; Polyamines; *Cicer arietinum* **104**, 169

Germplasm conservation; *Colocasia esculenta* var. *esculenta* (L.) Schott; Plant regeneration; Thin section culture; Taro **104**, 93

Gynogenesis; *Allium cepa*; Onion; Haploid plants; Thidiazuron; Flow cytometry; Isozymes; RAPD; Gametoclonal variation **104**, 215

H^+-ATPase; *Beta vulgaris* L.; Plasma membrane; Sugar transport; Proton pumping; Mannose **104**, 153

Haploid plants; *Allium cepa*; Onion; Gynogenesis; Thidiazuron; Flow cytometry; Isozymes; RAPD; Gametoclonal variation **104**, 215

Heterosis; Maize; *Zea mays* L.; Photosynthesis; Photoacoustic spectroscopy; Open photoacoustic cell **104**, 177

Hypersensitive reaction; *Nicotiana tabacum*; *Phytophthora cryptogea*; Cryptogein; Esterified and/or glycosylated sterols; Phytoalexin **104**, 117

In vitro culture; Ethanol metabolism; Plant hormones; Tobacco; Gas chromatography **104**, 147

In vitro fertilisation; *Zea mays* L.; In vitro pollination; Gamete isolation; Characterisation and manipulation **104**, 1

In vitro pollination; *Zea mays* L.; In vitro fertilisation; Gamete isolation; Characterisation and manipulation **104**, 1

In vivo and in vitro protein synthesis; Abscisic acid (ABA); Embryogenesis (somatic); Methyl jasmonate (JaMe); Osmotic stress; *Nicotiana plumbaginifolia* **104**, 59

Isozymes; *Allium cepa*; Onion; Haploid plants; Gynogenesis; Thidiazuron; Flow cytometry; RAPD; Gametoclonal variation **104**, 215

Lipid peroxidation; Petals; Aging; Ethylene; Antioxidant enzymes **104**, 161

Lycopersicum esculentum; Polyamine; Photoperiod; Thermoperiod **104**, 11

Lytic peptide; Cecropin; Peach; *Prunus persica*; *Pseudomonas syringae* pv. *syringae*; Bacteriocidal polypeptide **104**, 17

Maize; Heterosis; *Zea mays* L.; Photosynthesis; Photoacoustic spectroscopy; Open photoacoustic cell **104**, 177

Mannose; *Beta vulgaris* L.; Plasma membrane; Sugar transport; H^+-ATPase; Proton pumping **104**, 153

Methyl jasmonate (JaMe); Abscisic acid (ABA); Embryogenesis (somatic); In vivo and in vitro protein synthesis; Osmotic stress; *Nicotiana plumbaginifolia* **104**, 59

Microprojectile bombardment; *Triticum aestivum*; Pollen embryoid; Transformation **104**, 81

Microspore culture; Androgenesis; Embryogenesis; (Doubled) Haploid; Tulip; *Tulipa gesneriana* **104**, 101

Ni tolerance; Cell culture; Selection; Toxicity **104**, 225

Nicotiana plumbaginifolia; Abscisic acid (ABA); Embryogenesis (somatic); In vivo and in vitro protein synthesis; Methyl jasmonate (JaMe); Osmotic stress **104**, 59

Nicotiana tabacum; *Phytophthora cryptogea*; Hypersensitive reaction; Cryptogein; Esterified and/or glycosylated sterols; Phytoalexin **104**, 117

Nicotiana; Pollen electrotransformation; Tobacco; DNA Transformation **104**, 49

Oleosin; *Brassica napus*; Transgenic tobacco; Oleosin targeting **104**, 39

Oleosin targeting; *Brassica napus*; Oleosin; Transgenic tobacco **104**, 39

Onion; *Allium cepa*; Haploid plants; Gynogenesis; Thidiazuron; Flow cytometry; Isozymes; RAPD; Gametoclonal variation **104**, 215

Open photoacoustic cell; Heterosis; Maize; *Zea mays* L.; Photosynthesis; Photoacoustic spectroscopy **104**, 177

Oryza sativa; Cadmium; Ethylene; Temperature **104**, 135

Osmotic stress; Abscisic acid (ABA); Embryogenesis (somatic); In vivo and in vitro protein synthesis; Methyl jasmonate (JaMe); *Nicotiana plumbaginifolia* **104**, 59

Peach; Cecropin; *Prunus persica*; *Pseudomonas syringae* pv. *syringae*; Bacteriocidal polypeptide; Lytic peptide **104**, 17

Petals; Lipid peroxidation; Aging; Ethylene; Antioxidant enzymes **104**, 161

Photoacoustic spectroscopy; Heterosis; Maize; *Zea mays* L.; Photosynthesis; Open photoacoustic cell **104**, 177

Photoperiod; *Lycopersicum esculentum*; Polyamine; Thermoperiod **104**, 11

Photosynthesis; Heterosis; Maize; *Zea mays* L.; Photoacoustic spectroscopy; Open photoacoustic cell **104**, 177

Phytoalexin; *Nicotiana tabacum*; *Phytophthora cryptogea*; Hypersensitive reaction; Cryptogein; Esterified and/or glycosylated sterols **104**, 117

Phytophthora cryptogea; *Nicotiana tabacum*; Hypersensitive reaction; Cryptogein; Esterified and/or glycosylated sterols; Phytoalexin **104**, 117

Plant hormones; Ethanol metabolism; In vitro culture; Tobacco; Gas chromatography **104**, 147

Plant regeneration; *Colocasia esculenta* var. *esculenta* (L.) Schott; Thin section culture; Germplasm conservation; Taro **104**, 93

Plasma membrane; *Beta vulgaris* L.; Sugar transport; H^+-ATPase; Proton pumping; Mannose **104**, 153

Plasma membrane; Ca^{2+}-Translocating ATPase; Calmodulin; Carrot suspension culture **104**, 23

Plasmolysis; Cell wall; Protein and DNA uptake; Cell viability; Epidermal cells, suspension culture cells **104**, 201

Pollen electrotransformation; Tobacco; DNA Transformation; *Nicotiana* **104**, 49

Pollen embryoid; *Triticum aestivum*; Microprojectile bombardment; Transformation **104**, 81

Polyamine; *Lycopersicum esculentum*; Photoperiod; Thermoperiod **104**, 11

Polyamines; Ethylene; *Cicer arietinum*; Germination **104**, 169

Porphyra yezoensis; Catalase; Seaweed; Enzymatic properties; Antioxidant enzymes **104**, 127

Protein and DNA uptake; Cell wall; Plasmolysis; Cell viability; Epidermal cells, suspension culture cells **104**, 201

Proton pumping; *Beta vulgaris* L.; Plasma membrane; Sugar transport; H^+-ATPase; Mannose **104**, 153

Protoplasts; *Tagetes*; Thiophenes; Secondary metabolism **104**, 139

Prunus persica; Cecropin; Peach; *Pseudomonas syringae* pv. *syringae*; Bacteriocidal polypeptide; Lytic peptide **104**, 17

Pseudomonas syringae* pv. *syringae; Cecropin; Peach; *Prunus persica*; Bacteriocidal polypeptide; Lytic peptide **104**, 17

RAPD; *Allium cepa*; Onion; Haploid plants; Gynogenesis; Thidiazuron; Flow cytometry; Isozymes; Gametoclonal variation **104**, 215

Respiration; Bulb scales; Cold storage; Cyanide-resistant respiration; Tulip; *Tulipa gesneriana* **104**, 31

Seaweed; Catalase; *Porphyra yezoensis*; Enzymatic properties; Antioxidant enzymes **104**, 127

Secondary metabolism; *Tagetes*; Thiophenes; Protoplasts **104**, 139

Selection; Cell culture; Ni tolerance; Toxicity **104**, 225

Shoot meristem.; Ethylene; Ethephon; Ethylene inhibitors; White spruce (*Picea glauca*); Somatic embryo maturation **104**, 71

Somatic embryo maturation; Ethylene; Ethephon; Ethylene inhibitors; White spruce (*Picea glauca*); Shoot meristem. **104**, 71

Sugar transport; *Beta vulgaris* L.; Plasma membrane; H^+-ATPase; Proton pumping; Mannose **104**, 153

Tagetes; Thiophenes; Protoplasts; Secondary metabolism **104**, 139

Taro; *Colocasia esculenta* var. *esculenta* (L.) Schott; Plant regeneration; Thin section culture; Germplasm conservation **104**, 93

Temperature; Cadmium; Ethylene; *Oryza sativa* **104**, 135

Thermoperiod; *Lycopersicum esculentum*; Polyamine; Photoperiod **104**, 11

Thidiazuron; *Allium cepa*; Onion; Haploid plants; Gynogenesis; Flow cytometry; Isozymes; RAPD; Gametoclonal variation **104**, 215

Thin section culture; *Colocasia esculenta* var. *esculenta* (L.) Schott; Plant regeneration; Germplasm conservation; Taro **104**, 93

Thiophenes; *Tagetes*; Protoplasts; Secondary metabolism **104**, 139

Tobacco; Ethanol metabolism; In vitro culture; Plant hormones; Gas chromatography **104**, 147

Tobacco; Pollen electrotransformation; DNA Transformation; *Nicotiana* **104**, 49

Toxicity; Cell culture; Ni tolerance; Selection **104**, 225

Transformation; *Triticum aestivum*; Pollen embryoid; Microprojectile bombardment **104**, 81

Transgenic tobacco; *Brassica napus*; Oleosin; Oleosin targeting **104**, 39

Triticum aestivum; Pollen embryoid; Microprojectile bombardment; Transformation **104**, 81

Tulip; Androgenesis; Embryogenesis; (Doubled) Haploid; Microspore culture; *Tulipa gesneriana* **104**, 101

Tulip; Bulb scales; Cold storage; Cyanide-resistant respiration; Respiration; *Tulipa gesneriana* **104**, 31

Tulipa gesneriana; Androgenesis; Embryogenesis; (Doubled) Haploid; Microspore culture; Tulip **104**, 101

Tulipa gesneriana; Bulb scales; Cold storage; Cyanide-resistant respiration; Respiration; Tulip **104**, 31

Vitis vinifera; Embryogenesis; Auxins; Abscisic acid **104**, 193

White spruce (*Picea glauca*); Ethylene; Ethephon; Ethylene inhibitors; Somatic embryo maturation; Shoot meristem. **104**, 71

***Zea mays* L.**; Heterosis; Maize; Photosynthesis; Photoacoustic spectroscopy; Open photoacoustic cell **104**, 177

***Zea mays* L.**; In vitro pollination; In vitro fertilisation; Gamete isolation; Characterisation and manipulation **104**, 1
